From the Founders Desk.

I hope that this pandemic situation will get over soon and people could easily fulfil their basic need and live better life. Apart from NGO work we appeal many individuals to reach to the poor and needy. Our nation has shown solidarity and unity while providing help in this pandemic crisis.

Spandan Yuva Pratishthan has changed its working style and culture to meet the current requirement of the society and hence we came with some different kinds of programs to serve the poor.

At the beginning of the year, we were focusing on the programs which Spandan wanted to execute over the period of time. But, at later stage we realise that we should extend our holding hand where there is a need. At the end it is necessary to see whether we are fulfilling the need of society in systematic way or not.

We believe that we should stand with our people when they desperately need any help. We have also start to reach to the rural area of Maharashtra with our CSR activities in coming year we are planning to go pan India level.

I again appeal everyone to stand with the vulnerable people in pandemic situation. Team Spandan has also engaged in community progress and development, where we have stake.
